

ANTHONY B. CAYONTE

Unity Game Developer
0991 966 8482 | abcayonte@astean.bistcast.edu.ph
Concepcion Pequena, Naga City
Portfolio: <https://kanekazn.github.io/>
Github: <https://github.com/Kamot-Tech>

PROFESSIONAL SUMMARY

Game Developer specializing in Unity and C# with experience developing gameplay systems, AI behaviors, multiplayer features, and UI systems across academic, game jam, and team-based projects. Experienced in Git-based collaboration, debugging, and delivering complete game experiences from prototype to deployment.

EDUCATION

Bachelor of Science in Entertainment and Multimedia Computing (Game Development)
Bicol State College of Applied Sciences and Technology
Graduated 2026

TECHNICAL SKILLS

Languages

- C#
- C++
- JavaScript

Tools

- Git
- GitHub
- Visual Studio
- Maya

ACHIEVEMENTS

- 2nd Runner-Up – Bicol University Game Jam
- 19th Place – YCC2 Competition
- Developed 5+ Unity game projects
- Led development teams of up to 5 member

Game Development

- Unity
- Gameplay Programming
- AI Systems
- UI Systems
- Debugging
- Mobile Game Development
- OOP
- Scriptable Object

PROJECT EXPERIENCE

RAKAZON: Convergence – Online Turn-Based RPG (Internship Project)

Tech: Unity, C#, Git, Multiplayer Systems, UI Development, Build Management

- Designed and implemented core online systems including Guild System, Chat System, and Friend System using Unity and C#.
- Collaborated with a student internship team to develop an online turn-based RPG from concept to implementation.
- Developed and integrated UI systems for social and multiplayer features.
- Managed build system setup and deployment workflow.
- Handled GitHub repository management, including branch merging and resolving merge conflicts.

MR. KUPIDO – 2D Shooter

Tech: Unity, C#, Git, Debugging, Animation Systems

- Debugged the game and helped with the game character animation using Unity and C#.
- Collaborated with a 9-member team using Git for version control.
- Submitted the project to YCC2, achieving 19th place.

MENDVILLE – 2D Educational Casual Arcade (Aug–Oct 2025)

Tech: Unity, C#, Gameplay Programming, Drag-and-Drop Mechanics, Prefab Management, Scriptable Objects

- Led programming development and implemented the majority of gameplay systems in a 5-member team.
- Designed and developed core systems including breeding mechanics, drag-and-drop interactions and prefab-based object management.

- Performed debugging and system optimization to ensure stable multiplayer functionality.

SORT IT OUT – 3D Survival Game (Capstone Project)

Tech: Unity, C#, Enemy AI, Gameplay Programming, Prefab Management

- Designed the game's core concept and gameplay loop.
- Developed gameplay mechanics and tutorial systems using Unity and C#.
- Implemented enemy AI behaviors and interactions.
- Created, configured, and optimized game prefabs.
- Collaborated with a team to deliver the project as part of academic requirements

SALDANG: The Lost Soul of Bicol

Tech: Unity, C#, AI Systems, Character Animation, Game Development

- Implemented enemy AI systems, character animations, and enemy animations using Unity.
- Collaborated with a 5-member team and secured 2nd Runner-Up at the Bicol University Game Jam.
- Implemented game logic for results, dialogues, tutorials, and player interaction systems using Unity and C#.
- Coordinated with team members to integrate gameplay features and ensure functional game flow.
